

## *SSE Technologies: We Solve Application Problems*

Every business is unique—including yours. That's why we offer a flexible suite of automatic data collection (ADC) solutions to solve your application problems. From standard off-the-shelf packages to fully customizable systems, SSE Technologies can deliver a solution that meets the specific needs of your business.

As a value added reseller for the industry's leading technology providers, we can help you design and implement a wide range of automatic data collection solutions. Our applications expertise encompasses asset tracking, factory data collection, warehouse management,

labeling systems and more. SSE Technologies brings a wealth of experience to build a solution that's right for you.

Evolving from our beginnings as an electronics distributor in 1936, SSE Technologies has grown to become one of the leading ADC solutions providers in the region. Our reputation for technical proficiency is matched only by our dedication to ensuring complete customer satisfaction. Our knowledgeable sales and support personnel are at your service, delivering solutions to your applications problems. And, as a certified solutions provider for the industry's leading hardware manufacturers, your system will be installed utilizing state-of-the-art data collection and RF communications technologies.

Our long-standing relationships enable us to support our customers by providing unique answers that meet your most demanding applications. Look to SSE Technologies for total bar code scanning and labeling solutions. We think you'll like what you see.

**SSE Technologies**

*SSE Technologies solves your most difficult application problems! Rely on us for unparalleled support, service and systems integration expertise for all your automatic data collection needs. Look to SSE Technologies for these value added services:*

- Certified technicians. As certified partners for many of the industry's leading technology providers, our staff technicians are fully trained to handle all system installations, upgrades and repairs.
- Unparalleled customer support. Experienced help desk and field personnel are always on call to answer your questions and meet your needs—anytime.
- Customized system documentation and training. We provide skilled training personnel and documentation specific to your solution so your users are always "in the know."
- Complete system installation. We design, build and install your bar code scanning and labeling solutions. We're with you every step of the way, from design to system implementation.
- Critical spares and supplies inventory. We stock the parts you need to minimize downtime and to keep your business moving.

# Innovative Solutions for Automatic Data Collection Applications

**SSE Technologies**

## Asset Management

Gain control of your valuable resources! SSE Technologies provides the hardware, software and applications expertise to deliver powerful tools to manage your equipment, records and more. Whether you need to control fixed assets such as electronics, computer components and peripherals or even paper documents, SSE Technologies brings the resources and responsiveness to help you track people, parts and products across your enterprise. SSE Technologies offers standard, customized and complete turnkey systems that enable you to trace and manage valuable fixed assets by location, type, age and life of lease, ownership, service history and support contacts—all in a user-friendly Windows® environment. For your asset management needs, SSE Technologies delivers security and control.

## Warehouse Management Systems

Operate your warehouse with greater efficiency! SSE Technologies provides standard and customizable solutions to automate your critical warehouse applications. Reduce dead-heading and improve your pick-and-place productivity. Efficiently receive goods, enter data and manage put-away tasks for easy product and component access. Our solutions even tie into your existing Electronic Data Interchange (EDI) systems to help you better manage manifesting, inventory, picking, and shipping activities. For your warehouse management needs, SSE Technologies delivers efficiency and productivity.

## A Solution to Satisfy Every Need

SSE Technologies offers a wide variety of innovative bolt-on technologies and solutions that deliver superior performance for your mission critical applications including...

### Electronic Data Interchange

Solidify relationships with your supply chain partners through enhanced communications! If your business must comply with an Electronic Data Interchange (EDI) mandate, SSE Technologies can design a solution that meets your needs and your budget. Generate invoices, advance shipping notices, delivery schedules and any number of electronic documents. Real time communications increases efficiencies between you and your trading partners, allowing you to be more productive—and profitable.

### Sales Force Automation

Increase the productivity of your field sales representatives! SSE Technologies has the solutions to improve real time information flow between your sales force, host system and customers. Automate order taking, remote inventory and on-site inspections by enabling access to critical data and systems.

## Factory Data Collection

Close the loop on Manufacturing Resource Planning (MRP) and get a better handle on job tracking! Your factory floor productivity will reach new heights with SSE Technologies. Our data collection systems link work-in-process on the assembly line and shop floor with inventory and finished goods. Real-time information systems deliver the data you need to monitor all phases of manufacturing, so you can accurately track parts and subsystems as they cycle through every stage of the assembly process. SSE Technologies has the solutions that easily integrate with your existing MRP solutions. For your factory data collection needs, SSE Technologies delivers accuracy and reliability.

## Labeling Systems

The right label for every application! SSE Technologies can design and supply the proper hardware, software and printing media to satisfy all of your bar code labeling needs. We carry a wide range of rugged thermal and thermal transfer printers, offering you maximum flexibility in printing speeds, resolutions and label sizes. We have the solutions to meet your compliance labeling applications, enabling you to rapidly design individualized bar code formats for printing on a demand basis. For your bar code labeling needs, SSE Technologies offers flexibility and versatility.
